

Research and Development Tax Credit Studies

If you serve clients in the manufacturing, software development or bio-science industries, chances are there are opportunities for those clients to benefit from state and federal research and development tax credits.

BKD's dedicated R&D tax credit team uncovers research related tax savings through our four-phase approach

1. Identify Activities – We identify creditable projects and processes for recent years
2. Quantify Cost Determination – We review eligible disbursements for research credit calculations, analyze the base period and reconstruct it if needed.
3. Support Work Product – We document qualifying costs in a comprehensive report which can be used for future credit calculations and regulatory support
4. Revise and update as needed – We work with you and your client to analyze research costs and calculate credits for future years

Through your membership in INPACT Americas, you receive:

- A turnkey orientation that includes a presentation for your staff explaining this exciting opportunity
- 25% of the professional fees resulting from studies performed for your clients allocated to your firm under our lucrative fee sharing arrangement with INPACT Americas
- Access to marketing resources that include private label brochures and sales support

Contact Jason Jobgen to discuss the INPACT / BKD alliance for R&D tax credit services.
